Dear Writers,

Looking for places to get published and paid? I just put together a list of 24 articles for a university journal, that pay writers up to 10 dollars per article. Please read and stick to the article guidlines:

Call for journal chapters/papers.

INTERNATIONAL INSTITUTE OF PARIS, ÉTABLISSEMENT D'ENSEIGNEMENT SUPÉRIEUR PRIVÉ, JOURNAL PUBLICATION.

Title: Think Business, Think Artificial Intelligence, Think Smart.

Journal Title: Think Business, Think Artificial Intelligence, Think Smart

Call for journal chapters/papers.

We call for Chapters for the Journal Titled: **"Think Business, Think Artificial Intelligence, Think Smart",** which has ISBN and will be published in March 2024.

Institute Journal Title: We are pleased to announce the call for journal chapters for our upcoming Institute Journal titled **"Think Business, Think Artificial Intelligence, Think Smart". This journal aims** at anyone interested in the potential of AI in business, how AI is already being used in various industries, and anyone wanting to learn more about AI and its potential applications and implication in business. We welcome submissions from scholars, researchers, lecturers, professors and practitioners in the field of business and management in higher education systems. We encourage submissions on topics including, but not limited to:

1. How can businesses use artificial intelligence and still maintain originality?

2. What are some potential benefits of artificial intelligence for businesses?

3. What challenges do businesses need to be aware of when using

artificial intelligence?

4. How can businesses ensure that they use artificial intelligence ethically and

legally?

5. What is the future of artificial intelligence in business?

6. Business landscape and organizations must be prepared to take advantage

of the opportunities Artificial intelligence provides.

7. Organizations must carefully consider their AI strategy, taking into account

ethical and societal implications.

8. AI presents risks and opportunities for businesses, and it is essential to

manage these appropriately.

9. There is much hype around AI, but it is essential to remember that it is just a tool. How it is used will ultimately determine its success or failure.

10. Artificial intelligence is a game-changer for business and will continue to revolutionise business operations.

11. Artificial intelligence is still in its early stages, so there is potential for it to grow even more.

12. Businesses need to be aware of the potential of artificial intelligence and how it can impact their industry.

13. Artificial intelligence can help businesses stay ahead of the competition.

14. We should be careful not to allow AI to become a tool for oppression or control.

15. We need to ensure that the development of artificial intelligence is directed towards the common good and not for personal gain or glory.

16. What are the consequences of creating Artificial intelligence that could ultimately supersede or control humans?

17. However, artificial intelligence can also be used to manipulate data, which can lead to unethical outcomes.

18. However, artificial intelligence can also lead to errors and unforeseen consequences, which can be costly for businesses.

19. The danger of artificial intelligence is that it can create new opportunities for criminals.

20. There is a risk that artificial intelligence may not be able to replicate human intuition and creativity.

21. There is a danger that artificial intelligence may create new business risks and vulnerabilities and create ethical dilemmas for businesses.

22. Dependence on Technology: As businesses become more reliant on artificial intelligence, they could find themselves in a difficult position if the technology fails or is hacked.

23. Ethical Concerns: There are also ethical concerns about using artificial intelligence, as it could be used to violate human rights, manipulate people, or even encourage racism unfairly.

24. Security Risks: The use of artificial intelligence could also lead to new security risks, as hackers could target the systems that control the machines.

Submissions should be original and not previously published or under review elsewhere. All chapters will be subject to a rigorous peer review to ensure quality and relevance to the journal's theme.

Confirmation: If the entry seems qualitative by the Editor/s, you will get confirmation about the selection of the essay.

We request that you contribute a chapter to the journal, which may shoot up your authorship and highlight your profile to readers across the continents.

Open to writers from ALL COUNTRIES: Articles could be with a single author or with two authors.

Submit your article to learn@ogenduacademy.com before 1st March 2024.

The author will get the following in return.

1: Soft copy of the Journal

While sending articles, please note the following suggestions:

a) The article is purely investigative and sharply stated in 6-8 pages (A4 size)- For a chapter maximum, two authors are permitted

b) You may add one or two most relevant photographs, with or without a footnote. (If the photograph is taken from outside, show the source)

c) Check Grammar and Plagiarism (less than 10%) before submission. Lay out the pages (portrait) with a normal margin. Citation Methodology: Chicago manual or A.P.A.

d) Article typing format: Font: Times New Roman, Size: (Headings 14, Text 12), line space:1.15, references: wherever necessary.
